

HASA VHR QuickStart – Patient Search

From the “Patient Lookup” tab, you can search for a patient in the VHR by last name, first name, date of birth (mm/dd/yyyy), middle initial, gender, or MRN. Only one field is required, but the more fields you enter, the more targeted your search will become.

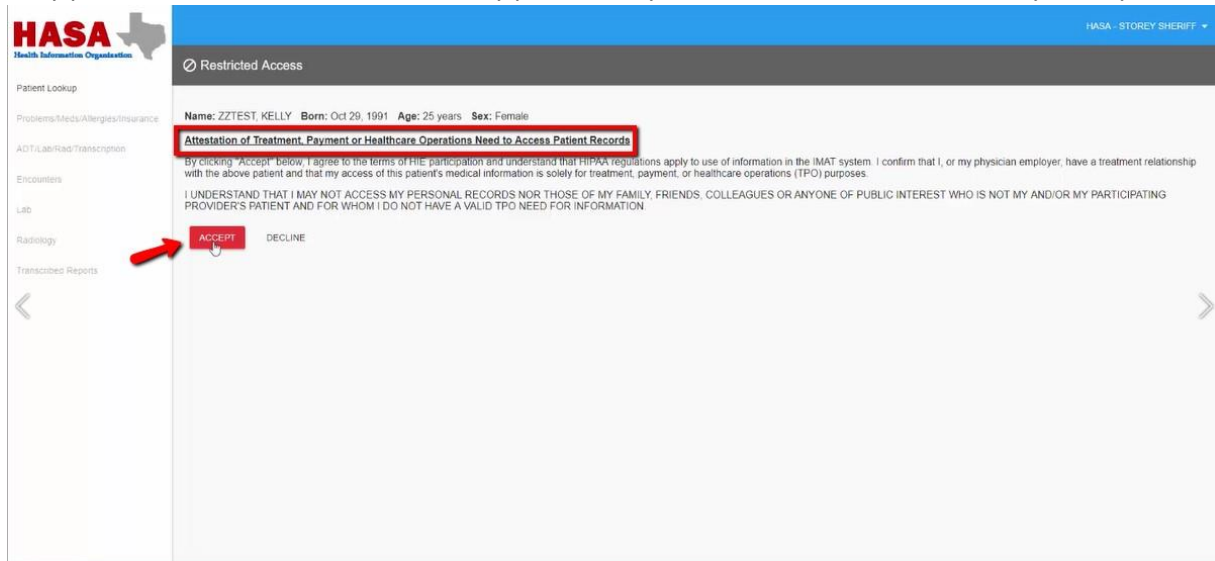

The screenshot shows the HASA Patient Lookup interface. The search fields are highlighted with a red box. The fields include: Last name, Date of birth (mm/dd/yyyy), First name, Middle initial, Gender, and MRN. There are 'SEARCH' and 'CLEAR ALL' buttons below the fields. A red arrow points to the 'Patient Lookup' tab in the left sidebar.

After entering your search information, click “Search”. A list of patients that match your criteria will appear in the box below. Scroll down to find the correct patient and click to select.

The screenshot shows the HASA Patient Lookup interface with search results. The search fields are filled with 'zztest' for Last name and MRN. The 'SEARCH' button is highlighted with a red arrow. Below the search fields is a table of patient records. The table has columns for Name, Gender, DOB, Phone Number, and Address. The row for ASOBGYSIX ZZTEST is highlighted in yellow.

Once you have clicked on the selected patient, you will see the “Attestation of Treatment, Payment or Healthcare Operations Need to Access Patient Records” page. Click “Accept” to view patient data. Every provider will check this box for every patient they view in the VHR for our security audit processes.

Once you have “Accepted”, you will be directed to the “Problems/Meds/Allergies/Insurance” tab, where you can begin reviewing your patient’s medical information.
